

IdentityForge Management Agents for FIM 2010

Bridging the Identity Divide

Key Features

- Authentication
- User Security Management
- Password Management
- Group Management
- Role Manager Integration
- Enhanced Performance
- Audit & Compliance
- Standard MA Integration
- Full & Delta Import/Syncs

Supported Adapters

- IBM-RACF
- IBM-iSeries (AS400)
- CA-TOP SECRET
- CA-ACF2
- SAP ERP Central Component
- Red Hat Enterprise Linux
- Solaris
- HP Non-Stop Tandem
- IBM-AIX

IdF Adapter Suites

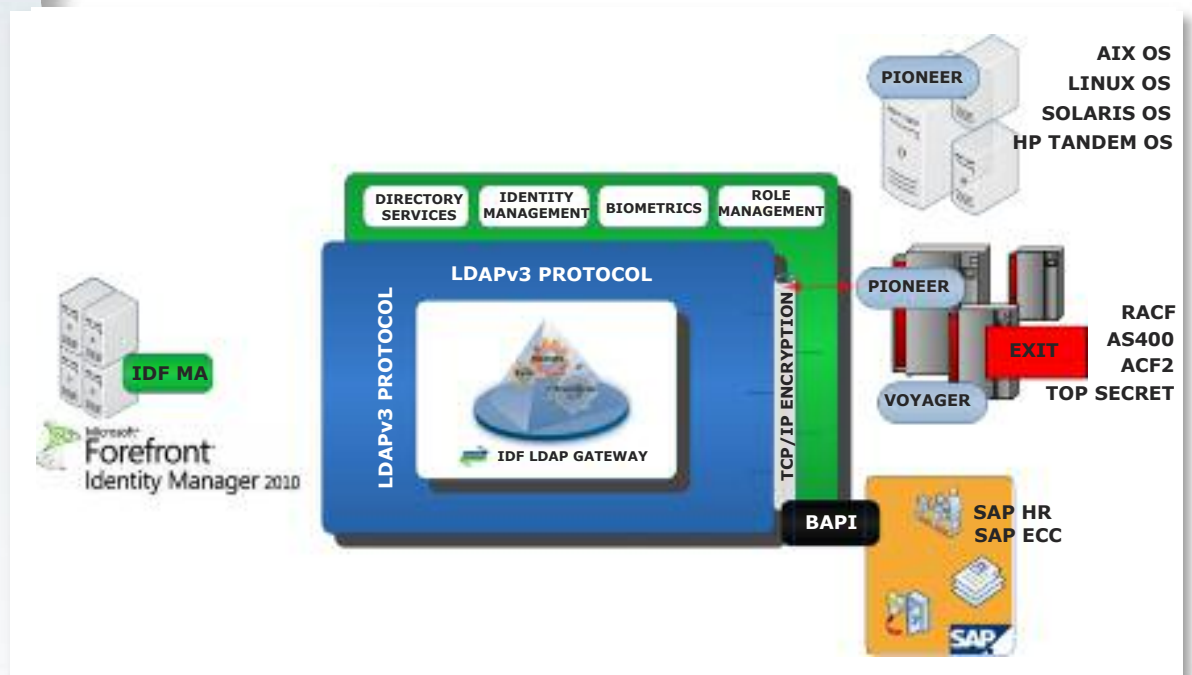

- Express Edition
- Enterprise Edition

IdentityForge's certified extensible Management Agents enhance Microsoft Forefront Identity Manager 2010 by integrating Mainframe, iSeries, ERP and OS target systems. The technology built on .NET working in concert with IdF's Advanced Adapter series presents the enterprise with a harmonious interaction between the many supported environments. IdF Management Agent securely provides native support for the bi-directional administration of user and group profiles, password synchronization and auditing. The relationship also provides reconciliation services and synchronization services between the IdF Advanced Adapters and Microsoft Forefront Identity Manager 2010, ILM, or MIIS.

The IdF Advance Adapters are tightly integrated with the IdF Management Agent allowing Forefront Identity Manager 2010, ILM, or MIIS to reconcile state-based full and delta imports along with real-time password synchronization for ease of population of target based system id's and profiles.

The IdF Advanced Adapters comprise of two components, the LDAPv3 Gateway and a Target System Agent (Pioneer and Voyager Agents). Both agents work together with the IdF LDAPv3 Gateway client allowing the Mainframe, ERP or other supported target system, to communicate natively with the IdF management agent. This elegant design provides the seamless communication between the two systems.

Figure 1.0 IdentityForge FIM MA Overview

User Management Features

- AUTHENTICATE USER WITH ID & PASSWORD
- CREATE, UPDATE, & DELETE USER/LOGIN ID
- RESET USER PASSWORD
- ENABLED/DISABLED USER
- ASSIGN/UN-ASSIGN USER TO GROUP
- ASSIGN/UN-ASSIGN USER TO ROLE

Full Import Reconciliation Features

- RETRIEVE ALL USERS
- RETRIEVE ALL GROUPS
- RETRIEVE ALL DATASETS/RESOURCES
- RETRIEVE ALL CUSTOM ATTRIBUTES

Password Management Features

- SELF-SERVICE CHANGE PASSWORD
- ADMIN PASSWORD RESET
- PASSWORD CAPTURE SYNCHRONIZATION
- PASSWORD POLICY ENFORCEMENT

System Management Features

- z/OS ALIAS MANAGEMENT
- DATASET/RESOURCE MANAGEMENT
- ACCESS & RESOURCE RULES
