- Salesforce CRM

IdentityForge's certified solutions enhance SAP NW Identity Management suite of products by integrating Mainframe, iSeries, ERP, Cloud, EHR/EMR and OS target systems. IdentityForge Advanced Adapter Suite presents the enterprise with a harmonious interaction between SAP NW and SAP Virtual Directory to the many supported enterprise environments needed for most identity management and governance initiatives that alleviates the cost and complexity of solving security challenges, effectively managing user lifecycles, and meeting compliance requirements

IdentityForge Advanced Adapters securely provides native support for the bi-directional administration of user and group profiles, password synchronization, monitoring, auditing and many more features. The relationship also provides reconciliation services and synchronization services between the IdentityForge Advanced Adapters and any of SAP IDM Suite of products in real-time.

The IdentityForge Advanced Adapters are tightly integrated with SAP NW IDM and SAP Virtual Directory using our LDAPv3 architecture, this allows SAP IDM to integrate using the standard, out-of-the-box LDAP adapter for either the Virtual Directory or IDM.
